HISTORIC ENVIRONMENT SCOTLAND FACILITY TIME 2017-18

The Trade Union (Facility Time Publication Requirements) Regulations 2017 placed a legislative requirement on relevant public sector employers to collate and publish, on an annual basis, a range of data on the amount and cost of facility time within their organisation.

In line with our obligation under these regulations, Historic Environment Scotland (HES) publish our report setting out the Facility Time of the HES union representatives and associated costs.

HES works in Partnership with its recognised Trade Unions of Prospect, Unite the Union and Public and Commercial Services Union (PCS). In summary, in 2017-18 HES had 23 union representatives across our three recognised Trade Unions. During this period, 10 undertook and recorded Trade Union activities or duties.

Within the time recorded by the representatives, 69.6% of the total Facility Time was spent on Trade Union activities which include attending meetings of branch or regional meetings of the recognised unions, attendance at the HES Partnership Board and HES Trade Union Alliance meetings and, in a year where the organisation saw an increase in new representatives, time to undertake learning and training. The attached annex provides a breakdown detail for the Facility Time records.

HES Management and our Trade Unions remain committed to working together to achieve shared aims, objectives and outcomes. This will be carried out in a spirit of mutual trust, openness and integrity as equal and joint partners in all matters relating to the general welfare, terms and conditions and working practices of all our staff.

Our Partnership Agreement confirms our commitment to working within the guidance provided by the ACAS 'Code of Practice – Time off for Trade Union Duties and Activities', and as such provide reasonable paid time off (Facility Time) to our union representatives to carry out trade union duties, activities and undertake training. We are also working with the Trade Unions to look at how we support and ensure the robust collation and recording of this future data.
